

MARGUERITA MCMANUS

*Quilting Teacher, Author,
Self-Publisher, Videographer*

My specialty is quilt-as-you-go and my books are well reviewed and popular with beginner and experienced quilters because when the project is complete they have a FINISHED quilt! My techniques can be adapted to fit many types of quilting, from crazy quilting to UFO's—I'd love to show you how!

I am passionate about ergonomics and comfort for sewing and quilting and I invented an inexpensive solution that works for all sewing machines. Wouldn't your guild members benefit from seeing it?

I am based in Nevada for the winter months and travel the southwest via RV. I will do my best to arrange multiple bookings in your location, to split expenses. Please contact me via email at MMQuilts@gmail.com

For more information about my books and teaching schedule please visit my website at www.crazyshortcutquilts.com

QUILT AS YOU GO

Simply Done

QAYG LECTURE & DEMO

I demonstrate the entire process of my quilt-as-you-go (QAYG) techniques for creating crazy quilts, modern quilts, T-Shirt quilts and how to use quilt-as-you-go to finish UFO's. You'll see quilts from each of my books and handle samples passed around the room.

1 hour lecture and demonstration—\$350*. Books avail. for purchase.

COMFORT!

The ONE thing that makes ALL the difference in machine quilting is a flat surface to support the quilt. ALL quilters need to learn how to take care of their bodies while sewing. A comfortable fit for your sewing area is as important as comfortable walking shoes—and (just as with shoes) there is no such thing as “one size fits all”.

My lecture and demonstration is of the largest, most innovative, inexpensive, unique, adaptable, custom fitted, ergonomically correct solution to create a perfectly flat, smooth, slick quilting surface that fits every single sewing machine. I talk about the three most important factors for creating an ergonomically correct sewing area and all of its customizable options.

You'll hear about my journey to find a properly fitted table and some surprising benefits to having one like mine. You'll come away with enough information to be able to create your own custom table in an hour or less, from materials sold at home improvement stores, using NO power tools.

1 hour lecture and demonstration—\$250* with QAYG books available for purchase..
